New Virtual Machine Wizard

Welcome to the New Virtual Machine Wizard

A virtual machine is like a physical computer; it needs an operating system. How will you install the guest operating system?

Install from:

☐ Installer disc:

No drives available

☒ Installer disc image file (iso):

C:\Users\ADMIN\Downloads\CC Lab Setup\ubuntu-18 ▾

Browse...

Ubuntu 64-bit 18.04.3 detected.

This operating system will use Easy Install. [What's this?](#)

☐ I will install the operating system later.

The virtual machine will be created with a blank hard disk.

New Virtual Machine Wizard

Ready to Create Virtual Machine

Click Finish to create the virtual machine and start installing Ubuntu 64-bit and then VMware Tools.

The virtual machine will be created with the following settings:

Name: 3sha

Location: C:\Users\ADMIN\Documents\Virtual Machines\3sha

Version: Workstation 16.2.x

Operating System: Ubuntu 64-bit

Hard Disk: 20 GB

Memory: 4096 MB

Network Adapter: NAT

Other Devices: 2 CPU cores, CD/DVD, USB Controller, Printer, Sound...

Customize Hardware...

☒ Power on this virtual machine after creation

New Virtual Machine Wizard

Specify Disk Capacity

How large do you want this disk to be?

The virtual machine's hard disk is stored as one or more files on the host computer's physical disk. These file(s) start small and become larger as you add applications, files, and data to your virtual machine.

Maximum disk size (GB):

Recommended size for Ubuntu 64-bit: 20 GB

☒ Store virtual disk as a single file
☐ Split virtual disk into multiple files

Splitting the disk makes it easier to move the virtual machine to another computer but may reduce performance with very large disks.
